

COMMUNITY ENDOWMENT FOR HUMAN INFRASTRUCTURE (CEHI)

Phase I: Establishing the Foundations

A Missing Layer of Infrastructure

Over the past century, humanity has built:

- Physical infrastructure (transportation, energy, cities)
- Digital infrastructure (internet, data, platforms)

But one critical layer is still missing:

Infrastructure that enables human beings to develop capabilities, make sound decisions, and live meaningful lives in an increasingly complex world.

What We Are Building

The **Community Endowment for Human Infrastructure (CEHI)** is a long-term initiative to develop:

- Human development communities
- AI-enabled infrastructure for decision-making and operations
- A transparent system for capital governance and value allocation (Public Ledger / CapOS)

Current Status (Full Transparency)

CEHI is currently in its **early formation stage**:

- Legal entity and fund structure are not yet finalized
- Institutional framework is under development
- Initial system architecture and pilot programs are being built

Phase I Priorities (Critical Build Stage)

We are focused on three foundational components:

1. Legal & Institutional Setup

- Establish legal entity

- Design fund / organizational structure
- Implement governance framework

2. Official Launch

- Public introduction of the ecosystem
- Formation of initial partnerships
- Activation of pilot initiatives

3. Transparency Infrastructure

- Development of a **Public Ledger system**
- Real-time tracking of contributions and allocations
- Accountability and reporting mechanisms

Fundraising Goal

\$300,000 – Foundation Phase

This capital will be allocated to:

- Legal structuring and compliance
- Technology development (Ledger / CapOS MVP)
- Core team and operations
- Pilot community deployment

Starter Milestone

\$50,000 – \$100,000

→ to initiate legal setup and early infrastructure immediately

Why This Phase Matters

Without:

- Legal legitimacy
- Transparent systems
- Governance structures

→ Trust cannot be established

→ Capital cannot scale

→ The system cannot grow

This is the foundation layer that determines everything that follows.

Commitments

- Full transparency of all financial flows
- Periodic public reporting
- Public recognition of contributions (via ledger)

How You Can Participate

- Financial contribution (donation / early support)
- Strategic partnership
- Builder participation (technology, governance, community)

Contribution Details (Temporary – Pre-Legal Setup)

Bank (Vietnam):

BIDV – NGO HUU NGHIA

Account Number: 2110841808

PayPal (International):

ngonghia.hp@gmail.com

(All contributions will be migrated to an official fund account upon legal completion.

Closing

We are not just building an organization.

We are laying the foundation for a new class of infrastructure – one that enables human development, strengthens communities, and helps society adapt to the age of AI.

If you believe this infrastructure should exist, this is the moment to help build it.

Community Endowment for Human Infrastructure

FAQ – Frequently Asked Questions

1. Is CEHI legally registered?

Not yet.

CEHI is currently in the formation phase and is actively working on:

- Legal entity registration
- Fund structuring
- Governance framework

This fundraising round is specifically to enable that process.

2. Why are contributions sent to a personal account?

At this stage, a formal fund account has not yet been established.

However:

- All transactions will be publicly recorded
- Funds will be transferred to the official entity once established
- Transparency and accountability are core commitments

3. How is transparency ensured?

We are developing a **Public Ledger system** that will:

- Record all contributions and allocations
- Provide visibility into fund usage
- Enable ongoing accountability

Additionally:

- Periodic reports will be published
- Financial flows will be openly disclosed

4. What happens if the initiative does not succeed?

- Funds will be used strictly for the stated purposes
- All expenditures will remain transparent
- Any assets or systems developed will remain as public or community-oriented infrastructure

5. Can I contribute in non-financial ways?

Yes:

- Strategic partnerships
- Technology and system development
- Advisory and governance support

6. Is CEHI a charity?

Not strictly.

CEHI is a **hybrid model**:

- Community infrastructure
- Technology systems
- Capital allocation platform

It is designed to generate sustainable value and support long-term impact.

7. Why contribute at this early stage?

Because this is the **highest-leverage phase**:

- Foundational decisions are being made
- Systems are being defined
- Early contributors shape the direction

8. What changes after legal completion?

- Official fund accounts
 - Formal governance structures
 - Ability to scale capital and partnerships
 - Expansion of ecosystem activities
-
